EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Howard Shipley on May 9, 2005.

The application has been amended as follows:

Claims 17-27 have been cancelled. These claims are directed to non-elected embodiments, and claim 1 is not generic to these embodiments.

In claim 1 line 17 "OOP" has been changed to ----out-of-position (OOP)-----.

In claim 7, line 4, "comes to lie" has been deleted and ----lies----- has been inserted.

In claim 14, line 1, "13" has been changed to ----12-----.

In claim 28, line 5, the second instance of "in which" has been deleted.

2. The following is an examiner's statement of reasons for allowance: Claims 1 and 28 include the limitation of a closing device having an open position in which the outlet is open and the inlet (or passage opening for claim 1) is at least partially closed, and a closed position, in which the outlet opening is closed, and a releasable lock configured to lock the closing device in the open position. A combination of this limitation and the other recited features was not reasonably found in the prior art. Swanberg et al. (US 5,707,078) teaches a closing device that includes a position in which the outlet is open

and the inlet is closed, but does not include a releasable lock. Additionally, the normally retained position is the closed position. Schramm (US 6,497,431) teaches a closing device that includes a position in which the outlet is open and the inlet is closed, but it is motor driven so as to provide adjustability, and does not include a releasable lock.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Muraoka, Brede et al., Faigle et al., Hawthorne et al., Schneider, Fischer et al. and Schramm, as noted above, teach air bag modules with selective venting of interest.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ruth Ilan whose telephone number is 571-272-6673.

The examiner can normally be reached on Monday-Friday, 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paul Dickson can be reached on 571-272-6669. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
